

# **HIGH COURT OF SINDH, KARACHI**

## **PRESS RELEASE**

**KARACHI, May 16, 2026:** The High Court of Sindh today held a launching ceremony for two transformative digital initiatives, the **LRC-Assistant (AI enabled Search Engine) and Mobile App (CFMS) on IOS Platform** both developed in-house by the **IT Department of the High Court of Sindh**. The ceremony reaffirms the Court's steadfast commitment to modernizing judicial administration and enhancing access to justice for all.

The **SHC Case Flow Management Mobile Application** is a user-friendly iOS platform developed by the **IT Department of the High Court of Sindh** to provide litigants, advocates, and citizens with convenient access to court services and case information. Key features include:

**Fixed Case Notifications** (hearing alerts via app); **e-Services** (online CTC requests, e-Notices, and e-Filing); **Case Search** (across SHC, Circuit Benches, and District Courts); and **Case Hub** (cause lists, court proceedings, judge rosters, and case schedules).

The **LRC-Assistant** is an AI-powered legal research and decision-support system conceived and developed by the **IT Department of the High Court of Sindh**. The system is designed to assist Hon'ble Judges and Research Officers through an intelligent chatbot interface, leveraging trained machine learning models and indexed judicial data repositories. It enables advanced query-based retrieval of judgments/orders. The system further integrates access to orders, case diaries, and related judicial records by extracting and processing data from scanned as well as digitized case files.

**The High Court of Sindh is the pioneer in introducing AI enabled Search Engine.**

Hon'ble Chief Justice Mr. Justice Zafar Ahmed Rajput, Chairman IT Committee, along with Members Mr. Justice Muhammad Faisal Kamal Alam, Mr. Justice Adnan Iqbal Chaudhry, and other Hon'ble Judges, appreciated the dedicated efforts of the IT Department of the High Court of Sindh.
